

Incentives for Greening Your Supply Chain

January 19, 2010 at Ernst and Young LLP, 515 Riverbend Dr. Kitchener, ON

Join I.E.Canada on January 19th at a special breakfast seminar hosted by Ernst & Young LLP in Kitchener focusing on the tools and skills you need to green your supply chain.

Greening the supply chain is no small undertaking. It can extend through a company's own internal processes and systems and can require suppliers and vendors to meet certain criteria in terms of environmental responsibility. It can involve manufacturing processes, materials, packaging, transportation and distribution.

Agenda:

7:30 am Registration and Breakfast

8:00 am Welcome and Opening Remarks

8:30 am Lakeside Logistics' Vision Green Program

As Director of Sustainability, Susan drives Lakeside's environmental initiatives. Within 1 year of launching the Vision Green program in May 2007, Lakeside achieved a 50% reduction in the company's carbon emissions. This was followed in 2008 with the next phases of the program, working with carrier partners and customers to develop processes to measure and reduce their carbon emissions. Lakeside is a carbon neutral company, and a member of the EPA Smartway program. The presentation will touch on the highlights of the Lakeside Vision Green program, outlining the benefits that a sustainability program can bring to supply chain companies.

*CATIE Award winner
Susan Moore, Director
of Sustainability,
Lakeside Logistics*

9:00 am Practices and Incentives to Green Your Supply Chain

Utilizing Six Sigma to Green the Scene

Six Sigma is a business strategy to improve the quality of output processes and minimize variability in the business process. Learn how this strategy can be applied to help in the greening of your supply chain.

*Toshiba of Canada
Limited*

Extended Producer Responsibility

Highlights from the Canada-Wide Action Plan for Extended Producer Responsibility (ERP) will be presented. This session will provide valuable insights into the responsibilities to be faced by producers under the ERP and the potential impact it will have on businesses. The various government incentive programs available to companies in order to comply with the ERP will also be covered.

*The Honourable John
Gerretsen, Minister of
the Environment,
Ontario (Invited)*

Tax Incentives Programs

A discussion on the Federal and Ontario legislative landscape with respect to income tax and other tax related incentives regarding the "greening" of a companies supply chain.

*Greg MacKenzie, CA
Manager
Ernst & Young Tax
Services*
